

# Weekly Coal Production

Production for Week Ended:  
September 5, 1992

## Summary

U.S. coal production in the week ended September 5, 1992, as estimated by the Energy Information Administration, totaled 19 million short tons. This was slightly lower than in the previous week, and 8 percent higher than in the comparable week in 1991.

Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons.
